[Changing Practices for the L2 Writing Classroom](#) Nigel A Caplan 2019-04-26 This volume was written to make the case for changes in second language writing practices away from the five-paragraph essay and toward purposeful, meaningful writing instruction. As the volume editors say, "If you have already rejected the five-paragraph essay, we offer validation and classroom-tested alternatives. If you are new to teaching L2 writing, we introduce critical issues you will need to consider as you plan your lessons and as you consider/review the textbooks and handbooks that continue to promote the teaching of the five-paragraph essay. If you need ammunition to present to colleagues and administrators, we present theory, research, and pedagogy that will benefit students from elementary to graduate school. If you are skeptical about our claims, we invite you to review the research presented here and consider what your students could do beyond writing a five-paragraph essay if you enacted these changes in practice." Part 1 discusses what the five-paragraph essay is not: it is not a very old, established form of writing; it is not a genre; and it is not universal. Part 2 looks at writing practices to show the essay's ineffectiveness in elementary schools, secondary schools, first-year writing classes, university writing courses, undergraduate discipline courses, and graduate school. Part 3 looks beyond the classroom at testing. At the end of each chapter, the authors—all well-known in the field of second language writing—suggest changes to teaching practices based on their theoretical approach and classroom experience. The book closes by reviewing some of the major questions raised in the book, by exploring which questions have been left unanswered, and by offering suggestions for teachers who want to move away from the five-paragraph essay. An assignment sequence for genre-aware writing instruction is included.

Transparency in Assessment - Exploring the Influence of Explicit Assessment

Criteria Anders Jönsson 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented, as opposed to learning oriented, when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together, in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.
