Aradia - Gospel Of The Witches Charles Godfrey Leland 2012 This book is annotated with a rare biographical sketch of the author, written by Elizabeth Robins Pennell. Indefatigable in research, Mr. Leland collects from the mouths of Italian peasants all the information still surviving concerning witches and their rites. Much of this he incorporated in his previous writings, and much more—some of it, we are glad to think, on the point of appearance—has yet to see the light. It is difficult to over-estimate the interest of these survivals in Italy of pagan faith and rite, and it is eminently desirable that so much of them as possible should be preserved. They are on the verge of disappearance, and what is not now reclaimed will inevitably perish. On this point Mr. Leland insists. There are still, however, some few people in the Northern Romagna who know the Etruscan names of the twelve gods. Invocations to Bacchus, Jupiter, Venus, Mercury, and the Lares may yet be heard, and there are women in the cities who mutter over the amulets they prepare spells known to the old Roman, and have lore which may be found in Cato or Theocritus. Aradia (Herodias), it may be said, is, according to the Vangelo of the witches, the daughter of Diana by her brother Lucifer, the god of the sun and of the moon, who for his pride was driven from Paradise. Aradia — not, Mr. Leland thinks, the Herodias of the New Testament, but an earlier replica of Lilith—is the chief patron of witches and the teacher of witchcraft. Deeply interesting is all that is said concerning her, and the book, which translates the poetic invocations, is a treasure-house to the student of witchcraft and myth. Contents: PREFACE CHAPTER I - How Diana Gave Birth to Aradia (Herodias) CHAPTER II - The Sabbat: Treguenda or Witch-Meeting--How to Consecrate the Supper CHAPTER III - How Diana Made the Stars and the Rain CHAPTER IV - The Charm of the Stones Consecrated to Diana CHAPTER V - The Conjunction of the Lemon and Pins CHAPTER VI - A Spell To Win Love CHAPTER VII - To Find or Buy Anything, or to Have Good Fortune Thereby CHAPTER VIII - To Have a Good Vintage and Very Good Wine by the Aid of Diana CHAPTER IX - Tana and Endamone, or Diana and Endymion CHAPTER X - Madonna Diana CHAPTER XI - The House of the Wind CHAPTER XII - Tana, The Moon-Goddess CHAPTER XIII - Diana and the Children CHAPTER XIV - The Goblin Messengers of Diana and Mercury CHAPTER XV - Laverna Comments on the Foregoing Texts The Children of Diana, or How the Fairies Were Born Diana, Queen of the Serpents, Giver of the Gift of Languages Diana as Giving Beauty and Restoring Strength Note Phytos olea. Alchemy Titus Burckhardt 1997-01-01 Spiritual attainment has frequently been described as a transformation whereby a human's leaden, dull nature is returned to its golden state. This wonderfully insightful volume introduces some of the metaphors useful for establishing attitudes required for the soul's advancement: trust, confidence, hope, and detachment. It is a reminder that when any substance or entity undergoes dissolution, it must eventually be resolved or re-crystallized in a new, possibly higher and more noble form.

The Turba Philosophorum Arthur Edward Waite 2021-01-01 The Turba Philosophorum, also known as the Assembly of the Philosophers, is one of the oldest European alchemy texts. It is considered to have been written c. 900 A.D. Nine philosophers take part in a discussion, being, once the text has been transcribed back to the original Arabic, Anaximander, Anaximenes, Anaxagoras, Empedocles, Archelaus, Leucippus, Ecphantus, Pythagoras and Xenophanes. The statements of the philosophers, whilst usually different from the known beliefs of the pre-Socratics, are usually recognisable as outgrowths of Greek philosophy. They discuss matter, how it acts, and relate this to cosmology, with three theses presented by Xenophanes in his closing speech, being, 1) The creator of the World is Allah, the God of Islam; 2) The world is of a uniform nature; 3) All creatures of the upper as well as of the lower world are composed of all four elements.

Innovation in Chinese Medicine Elisabeth Hsu 2001-09-27 In the West ideas about Chinese medicine are commonly associated with traditional therapies and ancient practices which have survived, unchanging, since time immemorial. Originally published in 2001, this volume, edited by Elisabeth Hsu, demonstrates that this is far from the reality. In a series of pioneering case-studies, twelve contributors, from a range of disciplines, explore the history of Chinese medicine and the transformations that have taken place from the fourth century BC onwards. Topics of discussion cover diagnostic and therapeutic techniques, pharmacotherapy, the creation of new genres of medical writing and schools of doctrine. This interdisciplinary volume will be of value to anyone with an interest in the various aspects of Chinese medicine.

Spiritual Alchemy Omraam Mikhaël Aïvanhov 2013-09-09 True Alchemy does not consist in the spectacular transmutation of base metals into gold, but in the spiritual transmutation of man's own matter. Grains of sand are transformed into pearls; summer sees twisted, blackened vine-stocks burst into leaf and bow beneath the weight of their grapes; caterpillars are metamorphosed into butterflies; galvanoplasty

transforms a drab piece of base metal into a golden ornament... All these different ways of transforming things are familiar to us but we have never studied them sufficiently closely to realize that they contain the secret of our own inner metamorphosis. If a tree, for instance, is capable of transforming the raw mineral nutrients it draws from the soil into the sugar-sap which enables it to produce flowers and fruits, why should man not do likewise? Why should we not be capable of transforming the raw juices of our instincts and passions so that they produce a rich harvest of flowers and fruit, in the form of vitality in our physical bodies, love and joy in our hearts and understanding and wisdom in our minds?

Emotional Alchemy Tara Bennett-Goleman 2002-04-23 Alchemists sought to transform lead into gold. In the same way, says Tara Bennett-Goleman, we all have the natural ability to turn our moments of confusion or emotional pain into insightful clarity. Emotional Alchemy maps the mind and shows how, according to recent advances in cognitive therapy, most of what troubles us falls into ten basic emotional patterns, including fear of abandonment, social exclusion (the feeling we don't belong), and vulnerability (the feeling that some catastrophe will occur). Through the simple practice of mindfulness taught in this book, we can free ourselves of such patterns and replace them with empathy for ourselves and others, as well as the freedom to be more creative and alive. You'll find the very latest research in neuroscience--including the neurological "magic quarter second," during which it is possible for a thought to be "caught" before it turns into an emotional reaction. And you'll discover the fascinating parallels of this science with the wisdom of ancient Buddhism--for Buddhists knew centuries ago that we can end our self-destructive habits. This remarkable book also teaches the practice of mindfulness, an awareness that lets us see things as they truly are without distortion or judgment, giving the most insightful explanation of how mindfulness can change not only our lives, but the very structure of our brains. Here is a beautifully rendered work full of Buddhist wisdom and stories of how people have used mindfulness to conquer their self-defeating habits. The result is a whole new way of approaching our relationships, work, and internal lives.

Alchimia degli oli essenziali. Nella tradizione del maestro Jeffrey Chong Yuen Franco Bottalo 2016 *Physiologus* 1979 One of the most popular and widely read books of the Middle Ages, "Physiologus" contains allegories of beasts, stones, and trees both real and imaginary, infused by their anonymous author with the spirit of Christian moral and mystical teaching. Accompanied by an introduction that explains the origins, history, and literary value of this curious text, this volume also reproduces twenty woodcuts from the 1587 version. Originally composed in the fourth century in Greek, and translated into dozens of versions through the centuries, "Physiologus" will delight readers with its ancient tales of ant-lions, centaurs, and hedgehogs and their allegorical significance. An elegant little book . . . still diverting to look at today. . . The woodcuts reproduced from the 1587 Rome edition are alone worth the price of the book. Raymond A. Sokolov, "New York Times Book Review"

Alchemy Marie-Luise von Franz 1980 "It was the genius of C.G. Jung to discover in the 'holy technique' of alchemy a parallel to the psychological individuation process. This book, by Jung's long-time friend and co-worker, completely demystifies the subject. Designed as an introduction to Jung's more detailed studies, and profusely illustrated, here is a lucid and practical account of what the alchemists were really looking for--emotional balance and wholeness"--back cover.

Magic and the Power of the Goddess Gareth Knight 2008-03-27 A manual of magical and mystical techniques for contacting the Goddess within • Draws from two thousand years of source material to demonstrate the ongoing reality of the feminine power and its relevance for today • Includes rituals, exercises, and techniques for evoking the Goddess • Explains how the dynamics of the sacred or magic circle serve as a guide to living harmoniously In this wide-ranging view of magic and ritual, Gareth Knight demonstrates the presence of the Goddess throughout Western esoteric traditions. From Greek myths and the Mysteries of Isis to the emergence of the cult of the Blessed Virgin and seventeenth-century Rosicrucian spiritual alchemy, he shows how the Goddess--the elemental consciousness of Earth--has revealed herself in different times and places. Honoring her many guises, Knight explores the powers of the Goddess as maiden, mother, initiator, protector, sorceress, and faery queen. Guided meditations on each of these qualities lead the practitioner into direct contact with the potent healing energy of the Divine Feminine. The author also offers rituals, exercises, and other practical tools for integrating the Western magical tradition with worship of the Goddess. He shows how we, and our planet, have suffered due to the repression of the feminine principle. For our own health, and that of our environment as well, we must recognize the power of the Goddess within to reconstitute and guide our existence.

Perfumery Steve Van Toller 2013-04-17 THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception. It is not. The primary function of the nose is to regulate the temperature and humidity of inspired air, thereby protecting the delicate linings of the lungs. This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril. The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways. The

olfactory receptors, innervated by the 1st cranial nerve, are located at the top of the nose. There are about 50 million smell receptors in the human olfactory epithelia, the total size of which, in humans, is about that of a small postage stamp, with half being at the top of the left and half at the top of the right nostril. The receptive surfaces of olfactory cells are ciliated and extend into a covering layer of mucus. There is a constant turnover of olfactory cells. Their average active life has been estimated to be about 28 days.

The History of Magic Chris Gosden 2020-07-16 A Telegraph Book of the Year A remarkable, unprecedented account of the role of magic in cultures both ancient and modern -- from the first known horoscope to the power of tattoos. 'Fascinating, original, excellent' Simon Sebag Montefiore _____ Three great strands of practice and belief run through human history: science, religion and magic. But magic - the idea that we have a connection with the universe - has developed a bad reputation. It has been with us for millennia - from the curses and charms of ancient Greek, Roman and Jewish magic, to the shamanistic traditions of Eurasia, indigenous America and Africa, and even today in the West when snapping wishbones or buying lottery tickets. Drawing on his decades of research, Professor Chris Gosden provides a history of human thought and how magic may help us rethink our understanding of the world. _____

'This is an extraordinary work of learning, written with an exhilarating lightness of touch . . . It is essential reading.' Francis Pryor, author of Britain BC, Britain AD and The Fens 'Without an uninteresting page' Scotsman 'Chris Gosden shows how magic explores the connections between human beings and the universe in ways different from religion or science, yet deserving of respect' Professor John Barton, author of A History of The Bible
