**Case Studies in Pharmacy Ethics** Robert Veatch 2010-04-10 Pharmacists face ethical choices constantly -- sometimes dramatic life-and-death decisions, but more often subtle, less conspicuous choices that are nonetheless important. Among the topics confronted are assisted suicide, conscientious refusal, pain management, equitable distribution of drug resources within institutions and managed care plans, confidentiality, and alternative and non-traditional therapies. Veatch and Haddad's book, first published in 1999, was the first collection of case studies based on the real experiences of practicing pharmacists, for use as a teaching tool for pharmacy students. The second edition accounts for the many changes in pharmacy since 1999, including assisted suicide in Oregon, the purchasing of less expensive drugs from Canada, and the influence of managed care on prescriptions. The presentation of some cases is shortened, most are revised and updated, and two new chapters have been added. The first new chapter presents a new model for analyzing cases, while the second focuses on the ethics of new drug distribution systems, for example hospitals where pharmacists are forced to choose drugs based on cost-effectiveness, and internet based pharmacies.

*Crisis of Conscience* Tom Mueller 2019-10-01 "A call to arms and to action, for anyone with a conscience, anyone alarmed about the decline of our democracy." – New York Times-best-selling author Wendell Potter "Powerful...His extensively reported tales of individual whistleblowers and their often cruel fates are compelling...They reveal what it can mean to live in an age of fraud." – The Washington Post "Tom Mueller's authoritative and timely book reveals what drives a few brave souls to expose and denounce specific cases of corruption. He describes the structural decay that plagues many of our most powerful institutions, putting democracy itself in danger."

–George Soros A David-and-Goliath story for our times: the riveting account of the heroes who are fighting a rising tide of wrongdoing by the powerful, and showing us the path forward. We live in a period of sweeping corruption -- and a golden age of whistleblowing. Over the past few decades, principled insiders who expose wrongdoing have gained unprecedented legal and social stature, emerging as the government's best weapon

against corporate misconduct--and the citizenry's best defense against government gone bad. Whistleblowers force us to confront fundamental questions about the balance between free speech and state secrecy, and between individual morality and corporate power. In *Crisis of Conscience*, Tom Mueller traces the rise of whistleblowing through a series of riveting cases drawn from the worlds of healthcare and other businesses, Wall Street, and Washington. Drawing on in-depth interviews with more than two hundred whistleblowers and the trailblazing lawyers who arm them for battle--plus politicians, intelligence analysts, government watchdogs, cognitive scientists, and other experts--Mueller anatomizes what inspires some to speak out while the rest of us become complicit in our silence. Whistleblowers, we come to see, are the freethinking, outspoken citizens for whom our republic was conceived. And they are the models we must emulate if our democracy is to survive.

**The Crisis of the Human Sciences** Thorsten Botz-Bornstein 2011-09-22 Centralization and over-professionalization can lead to the disappearance of a critical environment capable of linking the human sciences to the "real world." The authors of this volume suggest that the humanities need to operate in a concrete cultural environment able to influence procedures on a hic et nunc basis, and that they should not entirely depend on normative criteria whose function is often to hide ignorance behind a pretentious veil of value-neutral objectivity. In sociology, the growth of scientism has fragmented ethical categories and distorted discourse between our inner and outer selves, while philosophy is suffering from an empty professionalism current in many philosophy departments in industrialized and developing countries where boring, ahistorical, and nonpolitical exercises are justified through appeals to false excellence. In all branches of the humanities, absurd evaluation processes foster similar tendencies as they create a sterile atmosphere and prevent interdisciplinarity and creativity. Technicization of theory plays into the hands of technocrats. The authors offer a broad range of approaches and interpretations, reaching from philosophy of education to the re-evaluation of business models for universities.

Uneconomic Economics and the Crisis of the Model World M. Watson 2014-01-17 What has gone wrong with economics? This creates an 'uneconomic economics', where models explain relationships in blackboard rather than real-life markets.

**Honorable in Business** Annetta Gibson 2019-01-14 How can one be a Christian in the world of business, not just on the weekend? How can one be honorable in business? Through the integration of the Christian worldview and business ethics, this book provides Christians with a mental framework with which to answer these important questions. Beginning with Genesis as the foundation for the Christian's worldview and the Ten Commandments as the outline for the Christian's ethical obligations, the authors develop principles upon which ethical choices can be made, even when working in a primarily non-

Christian-oriented business environment. The book is designed to be helpful both to those beginning their career in business and those already employed in business who struggle with how to engage in today's business environment while maintaining their commitment to God's vision for life to be both meaningful and honorable. Topics of business ethics such as employee

rights, discrimination, technology and privacy, insider trading and accounting fraud, and the special challenges of working internationally are covered. The added value this book brings to these discussions lies in its serious consideration of the Christian worldview as foundational to ethical decision-making in everyday areas of business.
