Handbook of Test Development Suzanne Lane 2015-10-08 The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field. Including thirty-two chapters by well-known scholars and practitioners, it is divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on assessing noncognitive skills, measuring growth and

learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, *The Handbook of Test Development*, 2nd edition, is based on the revised Standards for Educational and Psychological Testing, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups.

The First 72 Hours Margaret O'Leary 2004 The First 72

Hours is the seminal anthology of the perspectives of public and private sector leaders who came together after September 11, 2001 to design more disaster-resilient communities. Under the umbrella of the Suburban Emergency Management Project, these leaders learned from national experts and one another that all disasters are intensely local at first and that most communities are "on their own" immediately following disaster impact-often for as long as 72 hours. This new awareness mandated updating strategies to improve disaster preparedness, particularly in light of the threat of terrorism. A wide gamut of perspectives are laid out in the book, including those of doctors and hospitals, city managers, police officers, firefighters, paramedics, American Red Cross volunteers, hospital accreditors, the media, business managers, utility companies, emergency managers, public health officials, academics, and elected public officials. In their own words, these individuals convey the importance of learning how to map the myriad organizations involved in local disaster preparedness and response; analyzing, refining and rehearsing local disaster roles; and getting to know individual personalities when in specific roles. The First 72 Hours is an essential resource for professionals and private citizens alike who want to know what kinds of questions must be asked and answered to better prepare their communities to survive future disaster. "There's a special providence in the fall of a sparrow. If it be now, 'tis not to come; if it be not to come, it will be now; if it be not now, yet it will come: the readiness is all."-Hamlet, act 5, scene 2
